

## MEMORIAL GARDEN ZOYSIA GRASS

The **Memorial Garden** has been sodded with a warm weather grass specifically designed for low-light areas (**Zeon Zoysia**). This grass will need less watering than the former Fescue grass of the Garden and will be more resilient to moss. Until the end of April it is requested that everyone stay off the sod while it takes root. For questions, please contact Jackie Straub.

Pictures of the installation, March 29, 2011 are shown below.
